

MAHFUZUR RAHMAN

DevOps & System Engineer

Dhaka, Bangladesh | Phone: 01516171979 | Email: dmahfuzd | LinkedIn:
<https://linkedin.com/in/mahfuz70>

PROFESSIONAL SUMMARY

DevOps & Platform Engineer with 8+ years of experience designing, automating, and operating enterprise infrastructure across banking, hosting, and large-scale production environments. Experienced in Kubernetes, container platforms, CI/CD automation, API gateways, observability, infrastructure security, and workflow orchestration. Proven track record of building internal developer platforms, deployment automation systems, monitoring solutions, and secure API management platforms within highly regulated enterprise environments. Skilled in Linux, Docker, Kubernetes, GitLab CI/CD, Jenkins, Kafka, Prometheus, Grafana, ELK Stack, and platform reliability engineering.

KEY ACHIEVEMENTS

- Designed and implemented an enterprise API Gateway platform with centralized routing, authentication, rate limiting, and observability for internal banking services
- Built an internal deployment platform automating application delivery for .NET, Node.js, Python, and containerized workloads across multiple environments
- Managed and optimized production Kubernetes infrastructure supporting mission-critical business applications
- Established centralized monitoring and logging platforms improving operational visibility and incident response capabilities
- Automated infrastructure and deployment workflows, significantly reducing manual operational effort and deployment risks

CORE SKILLS

- Platform Engineering: Kubernetes, Docker, Helm, Service Mesh, MetalLB, Ingress Controllers, Platform Automation
- CI/CD & DevOps: GitLab CI/CD, Jenkins, Git, Deployment Automation, Release Management, GitOps Concepts
- Monitoring & Observability: Prometheus, Grafana, ELK Stack, Alerting Systems, Log Analytics, Performance Monitoring
- Security & Infrastructure: HashiCorp Vault, RBAC, JWT Authentication, API Key Authentication, Linux Security, Network Security, Firewall Administration
- Messaging & Integration: Apache Kafka, Debezium, Event Streaming, Microservices Integration
- Infrastructure & Systems: Linux (Ubuntu, CentOS, RHEL), Windows Server, Nginx, Apache, DNS, System Administration, High Availability
- Automation & Scripting: Shell Scripting, Python, PowerShell, Ansible
- Development: Node.js, Express.js, React, REST APIs, Microservices
- Cloud Platforms: AWS / Azure (Fundamentals - in progress)

PROFESSIONAL EXPERIENCE

Assistant Officer (ICT Division)

Feb 2021 - Present

Jamuna Bank Limited | *Gulshan-1, Dhaka, Bangladesh*

- Administer and maintain production Kubernetes clusters with RBAC, resource governance, automated upgrades, and health monitoring
- Developed secure Docker-based CI/CD workflows with vulnerability scanning and automated image lifecycle management
- Implemented centralized observability solutions using Prometheus, Grafana, and ELK Stack for infrastructure and application monitoring
- Managed Harbor container registry with vulnerability scanning, retention policies, and CI/CD integration
- Developed an enterprise monitoring platform for server health, application uptime, alerting, and operational visibility
- Built an internal deployment platform automating build, release, deployment, rollback, and operational workflows across multiple technology stacks
- Designed and delivered an enterprise API Gateway platform featuring authentication, authorization, traffic control, route management, and observability
- Supported secure deployment and operation of critical banking applications within isolated enterprise infrastructure

Assistant IT Coordination Engineer

Jun 2019 - Feb 2021

Standard Group, Civil Engineers Limited | *Tejgaon I/A, Dhaka-1208, Bangladesh*

- Managed Linux and Windows Server environments across development, staging, and production systems
- Maintained infrastructure availability through proactive monitoring, patch management, and performance optimization
- Strengthened server security through firewall administration, access control management, and system hardening
- Automated administrative tasks using Bash, PowerShell, and scheduling tools
- Administered web servers, databases, and application servers supporting business-critical systems
- Developed operational procedures and infrastructure documentation supporting scalability and disaster recovery initiatives
- Collaborated with development teams to support CI/CD adoption and deployment standardization

System Support Engineer

Apr 2016 - Jun 2019

Hosting Bangladesh | *Dhaka Trade Center, Kawran Bazar, Dhaka-1215, Bangladesh*

- Managed Linux and Windows hosting infrastructure including shared hosting, VPS, cloud, and dedicated servers
- Administered DNS infrastructure, domain lifecycle management, and SSL/TLS implementation
- Automated server administration activities using Bash, Python, and PowerShell
- Supported customers with hosting, email, DNS, and infrastructure-related technical issues
- Optimized server performance and availability through proactive maintenance and troubleshooting

KEY PROJECTS

ProjectFlux - Internal Developer Platform

- Designed and developed an internal deployment and release management platform
- Automated GitLab-based build and deployment pipelines
- Implemented RBAC, deployment approvals, rollback capabilities, and audit reporting
- Integrated application deployment, load balancing, and API Gateway publication workflows
- Simplified operational processes for development and infrastructure teams

ProjectFlux API Gateway

- Developed a centralized API management platform using OpenResty, Node.js, and React
- Implemented JWT authentication, API-key security, rate limiting, and traffic monitoring
- Built draft-to-publish route management workflows reducing configuration risk
- Enabled operational visibility through real-time metrics and log analysis capabilities
- Supported deployment within air-gapped enterprise environments

AppFlux Monitor

- Developed centralized monitoring and alerting platform for production and pre-production infrastructure
- Implemented real-time health monitoring and role-based access controls
- Reduced manual monitoring effort through automated service health checks and notifications

EDUCATION

Bachelor of Science in Computer Science & Engineering	2017
Daffodil International University, Dhaka, Bangladesh	
Diploma in Computer Engineering	2012
Munshiganj Polytechnic Institute, Bangladesh Technical Education Board, Munshiganj, Bangladesh	
Secondary School Certificate	2007
Nao Bhanga Joypur High School, Comilla, Bangladesh	

LANGUAGES

- Bengali (Native)
- English (Professional Working Proficiency)

INTERESTS

- Passionate about DevOps and automation trends
- Enjoy nature walks accompanied by audiobooks and fiction
- Spending quality time with family and friends
